OBJECTIVE

Computer Science undergraduate with strong foundations in Data Structures, Algorithms, and backend development. Experienced in building scalable full-stack applications, REST APIs, and real-time systems with a focus on performance, clean architecture, and problem-solving. Seeking Software Engineering or Backend Engineering roles.

EDUCATION

•Bachelor of Technology in Computer Science 2023–2027
Vellore Institute of Technology CGPA: 8.3

PROJECTS

•Chemical Equipment Visualizer 2026
Django · PostgreSQL · REST APIs · Docker GitHub

- Built a full-stack analytics platform processing equipment records through optimized data pipelines, enabling efficient monitoring at scale.
- Implemented IQR-based anomaly detection and health scoring algorithms for automated risk classification, reducing manual review effort.
- Designed and exposed REST APIs; containerized the application using Docker and deployed across Railway and Vercel.

•RAG-Mitra — Retrieval-Augmented Generation System 2024
Python · LangChain · ChromaDB · Semantic Search GitHub

- Built a retrieval-augmented generation pipeline achieving sub-2s query latency using semantic vector search over a structured document corpus.
- Designed modular ingestion and retrieval layers to improve response accuracy and allow easy scaling to new knowledge domains.

•Crowd Scanner 2024
Python · OpenCV · YOLOv8 · GPU Acceleration GitHub

- Developed a real-time crowd detection system using YOLOv8, achieving 90%+ accuracy on live video streams.
- Optimized inference pipeline with GPU acceleration; evaluated model performance using precision, recall, and F1 metrics.

•VTOP Plus — Mobile Portal App 2026
Flutter · Dart · HTTP · HTML Parsing GitHub

- Built a native mobile app replacing the university’s browser portal by handling session cookies and CSRF token management programmatically.
- Implemented HTML parsing to transform raw server responses into clean, structured data displayed within a smooth mobile interface.

TECHNICAL SKILLS

Programming Languages: C++, Python, Java, JavaScript, SQL, Dart
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Networking, System Design
Frameworks & Libraries: Django, Flask, OpenCV, LangChain, Flutter
Databases: PostgreSQL, MySQL, MongoDB, Supabase, ChromaDB
Tools & Cloud: Git, Docker, AWS Educate, Oracle Cloud, Railway, Vercel

POSITIONS OF RESPONSIBILITY

- Co-Lead, Pahadi Club** | Vellore Institute of Technology 2024–Present
- Spearhead team coordination and event planning for the club, managing a cross-functional group of 20+ members.
 - Organized cultural events and community initiatives, improving member engagement and outreach across campus.
- Core Member, Pahadi Club** | Vellore Institute of Technology 2023–2024
- Actively contributed to community building efforts and played a key role in successful event planning and execution.
