B.Tech Computer Science · 2023–2027 · CGPA: 8.2

Summary

Backend-focused CS undergraduate with hands-on experience in scalable API design, computer vision pipelines, and RAG-based LLM systems. Shipped production-grade applications using Django, PostgreSQL, and Docker. Solved 300+ DSA problems. Seeking a Software Engineering Internship to contribute to high-impact engineering teams.

Technical Skills

- **Languages:** C++, Python, Java, JavaScript, SQL
- **Backend:** Django REST Framework, Flask, RESTful API Design, LangChain, RAG Pipelines
- **Databases:** PostgreSQL, MySQL, ChromaDB, Supabase
- **DevOps & Cloud:** Docker, CI/CD, Railway, Vercel, AWS (Basics), Oracle Cloud (Certified)
- **CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks, System Design

Projects

Chemical Equipment Visualizer

GitHub

Django · PostgreSQL · Docker · REST API · Statistical Modeling

- Built a full-stack production analytics platform processing **100+ industrial records in under 5s** via optimized statistical pipelines.
- Implemented IQR-based anomaly detection and health-scoring algorithms for automated equipment risk classification.
- Designed secure RESTful APIs with Django REST Framework; deployed via Docker + Railway + Vercel with CI/CD.

RAG-Mitra – Retrieval-Augmented Generation Backend

GitHub

LangChain · ChromaDB · Vector Embeddings · Python

- Designed a modular RAG pipeline with vector embeddings and semantic search achieving **sub-2s response latency**.
- Decoupled ingestion, indexing, and retrieval layers for scalability; integrated LLM generation with retrieval grounding for factual accuracy.

Crowd Scanner – Real-Time Video Analytics

GitHub

YOLOv8 · Computer Vision · GPU Inference · Python

- Deployed a YOLOv8 object detection pipeline for real-time crowd monitoring at **90%+ accuracy**.
- Optimized GPU inference throughput; evaluated model performance using Precision, Recall, and F1-Score benchmarks.

VTOP Bhopal Chill – Academic Portal Client

Flutter · Dart · Dio · HTTP Parsing · Session Auth

- Built a Flutter client replacing the browser portal via session-cookie auth, CSRF handling, and automated HTTP workflows.
- Engineered an HTML parsing engine transforming raw server responses into structured data; optimized state management with Dio interceptors.

Achievements

- **300+ problems** solved on LeetCode and Codeforces — strong DSA fundamentals across arrays, graphs, DP, and trees.
- **Oracle Cloud Infrastructure 2025 Certified** AI Developer Professional.
- Completed MATLAB Onramp certification (MathWorks).
